

About us

Head of the company is Dr.-Ing. Hans Joachim Weiskopf, responsible for outstanding success in the field of Technical Gases, especially in CO₂ since more than 35 years. He has access to a professional team of engineers and tradesmen, guaranteeing a qualified planning and execution of global projects.

What we stand for:

- ✓ Proficient planning and execution of global projects
- ✓ We set quality standards – since 1999
- ✓ Detailed documentation of your plant

weiskopf

engineering

Weiskopf Engineering is your professional partner to successfully manage projects in the field of CO₂-plant construction. We are your one-stop-shop and offer tailor-made solutions for your project, including production, construction, implementation as well as the supply of spare parts.

Planning & Delivery of CO₂ plants

CO₂-Engineering – when things become complex, we make your life easy!

Our Services

Our expertise in CO₂-engineering is extensive and based on a strong team of engineers and tradesmen. We design, calculate and provide professional advice for the construction of your CO₂-plant. Furthermore we plan and organize Installation- and Commissioning requests or support you with our expertise, in case you wish to construct a CO₂-plant single-handedly. You will be supported by our extensive range of professional services by having access to our Installation services as well as the supply of spare parts.

Production of CO₂-plants

In cooperation with our partners we produce, supply and assemble single components, sections of plants or entire plants.

We deliver:

- ✓ CO₂-production plants
- ✓ CO₂-gas purification plants
- ✓ CO₂-recovery plants
- ✓ Equipment
- ✓ CO₂-storage tanks
- ✓ Spare parts
- ✓ CO₂-filling plants
- ✓ Service
- ✓ CO₂ evaporators

Spare part supply for CO₂-plants

Our support continues even after handing over the plant. Our detailed documentation ensures the identification of each needed spare part which we deliver around the world within the shortest possible leadtime.

We are active on a global scale, e.g. in Africa, America, Asia and Europe. If you are interested in more information, we are happy to provide you with our detailed project- and customer overview.

Installation and Commissioning of CO₂-plants

We plan and organize Installation- and Commissioning requests globally. The execution of the Installation will be effected with our experts or by your own staff, depending on your wishes. We provide project supervision.

CO₂-Engineering

Benefit from our extensive experiences in the field of plant design. We are happy to stand by your side, from the very first idea up to the implementation. From the first proposal to design, from calculation to bid evaluation, from drawing of single components to line planning, from Installation inspection to implementation – we are your one-stop-source for CO₂-engineering.

If you plan to assemble a CO₂-plant yourself and with your own staff on your own premises, we will provide you with our knowledge as well as extended basic-engineering or detail-engineering.
